

Innovative Touch Switches

KAREES from Keetronics India Pvt Ltd has introduced a unique collection of touch electrical switches, meant for both domestic and commercial applications. These switches are shock-proof, easy to

install, and are enabled with master key to turn on/off all devices with a single touch. Further, these user-friendly switches come with remote control that helps in dimming and switching of lamps, and can also control speed of fans. They operate at an input voltage of 85-265VAC, 250mA, and can work with 1 to 14 load combinations.

Remote Control Switches

CORUM from Vinay Electricals has introduced unique remote control switches. These IR-based remote switches can adjust electrical loads of active drapery blinds etc. They come

with an 'All ON' and 'All OFF' to manage and control multiple devices. Further, they can be used for various applications such as dimming lights, slowing fan speed and much more. The Imago glass plates enhances their look; they are available in black and white shades.
